

Kamal Rajput Ray

Laravel Full Stack Developer | Fintech & Digital Lending

+91 9201698804 kamalrajputray@gmail.com kamal-rajput-ray Portfolio

PROFESSIONAL SUMMARY

Laravel Backend Developer with experience building secure, scalable web applications using PHP and Laravel. Skilled in REST APIs, PostgreSQL, third-party API integration, AWS S3, MinIO, and backend optimization. Passionate about writing clean, maintainable code and delivering high-performance backend solutions.

TECHNICAL SKILLS

- Languages:** PHP, JavaScript, Python, SQL
- Frameworks:** Laravel, jQuery, AJAX, Bootstrap, React (Basic)
- Databases:** PostgreSQL, MySQL
- Backend:** REST APIs, API Integration, MVC Architecture, Eloquent ORM, Authentication & Authorization
- Cloud Storage:** AWS S3, MinIO
- Tools:** Git, GitHub, Postman, Composer, VS Code
- Testing:** Python Playwright, API Testing, Unit Testing, Debugging

WORK EXPERIENCE

Laravel Backend Developer - Bluechip Private Limited

Jul 2024 - Nov 2024

- Learned and applied Laravel fundamentals to develop and maintain backend modules.
- Built and tested RESTful APIs using Laravel and Postman.
- Implemented user authentication and API request handling.
- Integrated third-party Email and SMS APIs for application notifications.
- Developed an email-sending API to automate transactional email delivery.
- Collaborated with senior developers to debug issues, optimize backend functionality, and follow Laravel best practices.

Laravel Backend Developer - Multifly Solutions Pvt. Ltd.

Nov 2024 - Present

- Integrated 20+ third-party APIs, including KYC (OCR, DigiLocker, PAN, Aadhaar, Voter ID, RC, Udyam, Face Verification) and eSign services (Docqfy, Signzy, SignDesk).
- Built secure, webhook-based integrations for real-time document status updates and external service synchronization.
- Designed and enhanced customer onboarding, loan processing, and admin modules with a focus on security, scalability, and maintainability.
- Managed secure document storage using AWS S3 and MinIO for reliable file management.
- Optimized API performance, database queries, and backend logic to improve application responsiveness and stability.
- Resolved production issues, performed root cause analysis, and collaborated with cross-functional teams to deliver reliable backend solutions.

KEY PROJECTS

Digital Loan Origination System (LOS)

Tech Stack: Laravel, PHP, PostgreSQL, MySQL, Redis, REST APIs, JavaScript, Bootstrap

- Developed a Loan Origination System (LOS) for digital loan processing.
- Integrated 20+ APIs including Aadhaar, PAN, DigiLocker, CIBIL, OCR, and eSign.
- Built secure REST APIs and automated workflows using Redis & Laravel Queues.
- Implemented RBAC, MIS reports, and Excel exports.
- Optimized database queries for faster API performance.
- Integrated AWS S3 & MinIO for secure document storage.

Achievement: Automated loan processing and improved system performance in production.

Insurance Origination System (IOS)

Tech Stack: Laravel, PHP, MySQL, PostgreSQL, REST APIs, JavaScript, Bootstrap

- Developed an Insurance Origination System (IOS) for policy onboarding, underwriting, and policy issuance.
- Integrated Equifax, Face Liveness, Identity Verification, and third-party APIs.
- Implemented bulk CSV/Excel import, PDF generation, and document management.
- Built RBAC for Admin, Agent, and Customer portals with audit logging.
- Developed secure REST APIs and automated policy workflows.

Achievement: Streamlined insurance operations by automating policy issuance, document processing, and compliance workflows.

LOS Report Module

LOS Report Module

Tech Stack: Python, FastAPI, PostgreSQL, SQLAlchemy, AWS S3/MinIO, Pandas, OpenPyXL

- Developed a high-performance LOS Report Module for large-scale loan data exports.
- Built Excel & ZIP report generation with optimized processing for faster downloads.
- Implemented Aadhaar masking for documents and images to ensure data privacy and compliance.
- Optimized PostgreSQL queries and batch processing using SQLAlchemy.
- Integrated AWS S3/MinIO for secure document storage and retrieval.

Achievement: Improved large report generation performance while ensuring secure, compliant document exports.

EDUCATION

Bachelor of Technology (B.Tech.)

2020 - 2024 |

CSVТУ University

Bachelor of Technology (B.Tech) - Computer Science & Engineering

Columbia Institute of Engineering & Technology, Raipur, Chhattisgarh

CERTIFICATIONS

- Laravel Development - PS Institute, Raipur
- PHP Development - Rays Academy, Raipur
- Flutter App Development - Rays Academy, Raipur

ACHIEVEMENTS

- Integrated 20+ third-party APIs for KYC, eSign, OCR, and payment services.
- Improved application performance through database and API optimization.
- Automated loan processing, verification, and reporting workflows.
- Developed 3 production-grade enterprise applications in FinTech and Insurance.
- Built secure document management with AWS S3/MinIO and Aadhaar masking.
- Optimized large-scale report generation for faster Excel and ZIP exports.
